Dear Agrisen Export

Regards the find of pesticide in morning glory with lot number 1-445-752

Test results of morning glory with the mentioned lot. No. has negative test results and did not comply with the regulations that exist for import into the EU, and since this has happened several times, with items, with this lot number, has not complied with the rules, we (Thailandia Import) highly recommend Agrisen Export to find a supplier, who does comply with the regulations for import to the EU, and bring back test results that comply with the existing EU laws. For your record, we also do testing on your products to be sure, you comply with the rules. Please take this issue serious, and reply on how you can prevent this issue in the future

Thank you very much

Regards

Diana
